The World's Most Extensive Supply of Deuterated Compounds

- *Largest Product Listing* •
 - *Largest Inventory* •
 - *Highest Quality* •
 - *Competitive Prices* •

Since 1993, C/D/N Isotopes Inc. has provided its customers with superior quality and exceptional service. Researchers in all branches of science and medicine, from around the world, depend on C/D/N Isotopes as the company for deuterium labelled compounds.

We currently have more than 3000 products in stock. As a result, we are able to ship most products within 24 to 48 hours after receipt of order. In fact, 98% of our orders are filled from stock.

The majority of the products listed in this catalog are manufactured exclusively by C/D/N Isotopes. Over the years, we have developed and expanded our expertise in the preparation of deuterated compounds. As a result, we are continuously adding new products — you will find more than 240 new products in this catalog which have been added since our 2012-2013 catalog.

Most new products are the direct result of inquiries from our customers. Our extensive Custom Synthesis capabilities allow us to develop the products that our customers need, in a timely manner and at a reasonable price. Our Quality Control ensures that the isotopic enrichment and chemical purity of our products meet the highest standards.

Add to this our fast, courteous and helpful Customer Service staff, and there is no better company to meet your needs for deuterated compounds.

QUALITY CONTROL

The listed Isotopic Enrichments are our minimum specifications for Quality Control release. The minimum standard for Chemical Purity is 98%, unless noted otherwise.

A Certificate of Analysis is provided with each product shipped, with the exception of NMR Solvents.

All of our products are non-radioactive and have a shelf life comparable to that of the corresponding unlabelled compounds.

CUSTOM SYNTHESIS

Please ask us about labelled compounds you do not find listed. The product that you need may have been prepared already, but is not included in this catalog.

We would be pleased to provide you with a quote for custom synthesis. Our extensive expertise in the preparation of stable isotope labelled compounds allows us to offer custom synthesis of products to meet your specific requirements. Contact our Technical Support staff to ask how we can meet your research requirements.

CHEMICAL ABSTRACT SERVICE NUMBERS

CAS Numbers, when they have been assigned to the labelled compound, are provided in brackets under the compound name.

You will also find the Unlabelled CAS Numbers, which correspond to the unlabelled version of the compound, on our website.

HANDLING HAZARDOUS COMPOUNDS

The listed products have properties and potential hazards similar to the corresponding unlabelled chemicals. Appropriate precautions should be taken at all times during their use and disposal.

A Material Safety Data Sheet (MSDS) is provided with each product shipped. MSDSs for our products are also available on our website at: www.cdnisotopes.com

OUR PRODUCTS ARE NOT INTENDED FOR USE IN HUMANS

They are offered for use as analytical standards and laboratory chemicals only. Approval from the appropriate government regulatory agency should be obtained prior to studies in which any labelled compounds are to be administered to humans.

LIMITED WARRANTY

C/D/N Isotopes Inc. warrants that the products are as described when shipped. There is no warranty, expressed or implied, as to the fitness of the compounds for any particular application. Quality claims should be made within 30 days of receipt of product. The maximum liability for C/D/N Isotopes Inc. shall be the replacement of the product or the refund of the purchase price.

We use packaging components which permit easy and safe handling, while protecting the integrity of the products. Liquid products, including NMR Solvents, are sealed in ampoules or are packaged in screw-cap bottles, when appropriate. Multi-dose septum vials are used for selected products. Solids are generally packaged in screw-cap bottles.

Gases are routinely packaged in carbon-steel lecture bottles.

Non-Corrosive Gases: The cylinder is fitted with a CGA 170 brass valve.

Corrosive Gases: The cylinder is fitted with a CGA 180 aluminum-silicon-bronze valve.

Certain other products are packaged in cylinders due to shipping regulations.

Smaller quantities of gases, such as 0.05 L, 0.1 L, 0.25 L and 0.5 L, can be packaged in breakseal glass flasks, upon request.

Lecture bottles are sold outright with the product and are non-refundable.
